Notes to support the table

Sea lice are adult females, presented as monthly averages (per fish).

Farms count sea lice every week. Figures are reported by calendar month. Therefore some months include five full weeks and some include four full weeks to cover the 52 weeks of the year.

"Fallow" = the farm was fallow or empty throughout the entire reporting month.

"Farm stocked in Jul." = the farm was fallow or empty at the start of the month but was restocked during the month.

"Farm fallowed in Jul." = the farm was stocked at the start of the month but became fallow or empty during that month.

"No count – Harvesting" = fish were being harvested throughout the month. Under such circumstances it is not always possible to record the lice count.

Statistics for July 2018

There are 209 active salmon farms in Scotland.

Of these, 153 (or 73%) were stocked at some point during July 2018.

This means 56 (or 27%) of the active farms were fallow or empty throughout July 2018.
